

Super skills of predators

How do they hunt?

Wild weapons

All predators have weapons such as fangs, teeth, beaks, jaws and claws.

Super size

Some predators are very big and strong. They can fight fiercely.

Super senses

Most predators can see, hear and smell well. Some sense prey from many miles away.

Team tactics

Some predators use teamwork to **ambush** prey. Then they attack!

Surprise

Some predators hunt at night. They strike in silence.

Stalk and chase

Many predators stalk their prey. Then with a burst of speed, the chase is on!
